Concerning the perpendicular lines on the back of each of the documents examined, he reported that these markings are indicative of the fact that the documents were reproduced on an SCM copying machine, the portable desk-top types namely 33, 44, 78, and 88. He described these markings as toner rib marks which is typical of the markings left by these portable machines. He also noted on several of these documents that in the center of the sheet there is a line that runs from the top to the bottom and this mark in his opinion was left by the feed switch or a lamp fold switch. These markings are also typical of the results of items reproduced on Models 33, 44, 78, and 88 of SCM. In addition, on the face of each of the copied documents there are perpendicular lines reasonably parallel and this also is a characteristic of these four portable SCM copiers.

The opinion of [redacted] was that the exposure setting on the machine used to copy the documents is under-exposed. He ventured this opinion that the individual who used the SCM copying machine did not know what they were doing. He is also of the opinion that an old model 33 or an old model 44 of SCM is the machine in question used to copy the documents referred to above. He stated that if a new portable type machine had been used the black border at the bottom and right-hand columns of each of the copied documents would not contain belt marks. He described this by stating that a conveyor belt which is a narrow strip of canvas approximately 2 1/2 to 3" wide is ~~used~~ used in the copying machine and it is the carrying mechanism of the paper that is being reproduced. [redacted] and [redacted]

[redacted], Speciality Coating Operations, Phoenixville, Pa., after examining the reproduced documents stated that in their opinion they were definitely reproduced on an SCM copier machine of the portable type and they are also of the opinion that it was an older model 33 or 44. They were unable to note from the items viewed any outstanding characteristics that could be used to identify the machine that was used to reproduce these documents.

Investigation has determined that the model 33 has been in production by SCM since 1961. These machines are either sold or leased but as a general rule the particular portable

PH 52-7165 SUB A

models are sold to the customers. All individuals that purchase these machines do not also purchase service contracts. The machines are resold by the original purchaser and according to other offices of SCM, Philadelphia, Pa., it would be an impossible task for locate all of the portable models presently in usage today.

As a result of the above, the evidence is being retained by the Philadelphia Office and is not being forwarded to Xerox Corporation at Rochester, N. Y.

By letter dated April 28, 1971, [redacted] President of the Xerox Corporation, advised the Director that it was the intent of the Xerox Corporation to cooperate fully with the FBI now and in the future in accordance with his statement of April 17, 1971. [redacted] noted that the unfortunate confusion which arose in this matter could have been avoided had Bureau representatives contacted Xerox Corporation Headquarters with our requests. He suggests that all future requests or communications be directed to [redacted], Office of General Counsel, Xerox Corporation.

In conclusion [redacted] stated that he felt badly about the confusion and there was never a question in his mind as to what the Xerox Corporation should do and he expressed confidence that all of the people in the Corporation understood this position. *an*

RECOMMENDATIONS:

(1) That the attached letter be approved for forwarding to [redacted]

DAMAGE ASSESSMENT

DOMESTIC INTELLIGENCE DIVISION

Memorandum Mr. Rosen to Mr. Sullivan, 4/26/71, reported additional copies of stolen documents received in mail by Washington bureau of "Los Angeles Times." These include one original document and copies of 15 other documents stolen from Media Resident Agency. Of 16 items, 14 pertain to Domestic Intelligence Division (DID) work, including the one original document; one regarded a Selective Service matter and one was a copy of a map of the U. S. showing locations of Bureau field offices and resident agencies. Six of the 14 DID related items were not previously known to have been stolen.

Attached for inclusion in running damage assessment brief (pages numbered 197-205) are individual writeups on the six new DID items. The other eight items have been previously assessed.

Racial Matters

Two items relate to work in this area. One is memorandum to all agents in Philadelphia Office from Special Agent in Charge pointing up need for Bureau to be furnished pertinent information regarding possible racial violence. The second is also Philadelphia memorandum which alerts Philadelphia Agents to Black Panther Party (BPP) convention and sets forth information regarding this convention needed by the Bureau on a weekly basis.

New Left and Miscellaneous Matters

One item relates to work in this area and pertains to investigation of an admitted former member of the Communist Party employed at the University of Pennsylvania. This document sets forth the name of an established source at the University who was to be contacted for information on the subject.

GENERAL INVESTIGATIVE DIVISION

Attached is summary of current investigation of 3-8-71, burglary of Media Resident Agency (RA).

On 4-22-71, a confidential source in Philadelphia obtained a retyping of the original press release of the Citizens Committee to Investigate the FBI (CCIF) from headquarters of National Committee For Sane Nuclear Policy (SANE). On 4-29-71, an individual observed a number of copies of this retyped press release in a trash container in a Bryn Mawr, Pennsylvania, parking lot. Copies obtained and sent to Laboratory for examination. Xerox Corporation requested to obtain specimens from machines at target locations for submission to Laboratory. Boston reliable source advised Resist at Cambridge, Massachusetts, in process of releasing fifth packet to news media of documents stolen from Media RA. Efforts being conducted to establish a connection between Resist and transfer of documents to Cambridge, Massachusetts, to support search warrant. The Philadelphia Inquirer reported on 4-30-71, telegram sent by CCIF to Peoples Coalition For Peace and Justice at Washington, D C., acknowledging responsibility for burglary at Media was sent from Newark, New Jersey. Investigation at Newark and Philadelphia reflects no such telegram sent and investigation by Washington Field Office confirmed no such telegram received. b6

Result of examination:

Meaningful comparisons cannot be made between handwriting and hand printing. Therefore, it was not possible to determine whether the writer of K4592 did or did not prepare the questioned hand printing on Q48 and Q49 in the instant case or the questioned material on specimens submitted in the EASTCON case.

It was determined that the typewriter impressions on K4592 were not prepared with the questioned typewriters used on specimens submitted in the instant case.

During the period [] was in contact with FATHER PHILIP BERRICAN and other principals of EASTCON case he represented himself to them as being an explosives expert. This was not true, however, and he asked handling agent if it would be possible to obtain any books on explosives which he could read and become better versed on explosives. He was particularly interested in books containing information about prima-cord inasmuch as he had suggested the use of this rather than dynamite or plastic explosives. Agents of the Lewisburg RA, through an established source who is an Army officer assigned to the ROTC at Bucknell University, obtained several ROTC training manuals. No record was made of the manuals and they were returned to source. *u*

During recent debriefing of [] he advised he had told [] he had explosives manuals in his possession. [] was very interested in the manuals and during a meeting in Lewisburg, Pa., on 9/5/70, he borrowed two of the manuals for the expressed purpose of reproducing them to be read by other members of the "movement". On 10/9/70 [] traveled to Lewisburg, Pa., to return one of the manuals to informant. Informant asked where the other

manual was and [] asked him if he realized how difficult they were to reproduce. He said it was necessary to do reproduction when there was no one around. He further advised the informant that [] had assisted him in reproducing the manual. On 10/23/70 [] again traveled to Lewisburg, Pa., to return the second manual. The informant asked him if he realized how "hot" this type of information was and [] said he did and that the copies were secreted at "the farm". Source took this to mean the farm rented by []. During a later conversation with [] after the publicity in the news media concerning the plots to destroy the underground pipes in Washington, D.C., and the plot to kidnap HENRY KISSINGER, [] stated this material had all been destroyed. *u*

On 4/17/71 source was recontacted regarding the manuals which were returned to him. He made available one copy each of training manuals FM 5-25 and TM 9-1375-200, which he believes were the ones he originally provided the FBI. As best the Special Agents involved can recall the FM 5-25 was definitely one of the manuals provided the informant but they are not sure of the second manual. The source advised the ROTC has only one copy each of these two manuals. *u*

Latent Fingerprint Section is requested to process each page of enclosed manuals for latent fingerprints of [] or any fingerprints of value to be compared against principals of EASTCON and MEDBURG. *u*

FBI Laboratory is requested to conduct any possible examination of pages of manuals which might show they have been reproduced. *u*

Submitted evidence should be returned to Philadelphia upon completion of examinations. *u*

The letter from "Resist" is as follows:

"For immediate release: Resist, a national resistance support group located in Cambridge, Massachusetts, today released copies of FBI files to selected newspaper and magazine reporters. These documents are copies of Xerox copies which Resist received from an anonymous source early this week. A covering letter (number one included in this packet) explains that the files were removed by the Citizens' Commission to Investigate the FBI from the Media, Pennsylvania, FBI office. *M*

"Resist acknowledges receipt of the documents and makes them public because we believe that the information contained therein constitutes a basic violation of the civil rights both of individuals and of groups working for social change. However, we have removed names and other identifying facts from most of the documents, for to reveal the identities of those who have been spied upon would expose them to increased harassment. To take on this burden should be their choice, not ours. *M*

"The reporters selected to receive those materials have been chosen because of their previously demonstrated courage in discussing domestic political repression. For an example of the courageous way in which these documents can be dealt with by the press, we refer them to the front page of the 'Washington Post,' March 24, 1971. Resist." *M*

The envelope is addressed to Editor, 'New York Times,' New York, New York," and bears postmarks of March 24, 1971, Cambridge, Massachusetts; March 25, 1971, New York, General Post Office; March 25, 1971, New York, New York, 11:30 a.m., New York Times Square Station; and March 26, 1971, New York, General Post Office 82. *M*

"On March 8th, the Citizens Commission to Investigate the FBI removed files from the Media FBI office in Pennsylvania. Your name was listed as an informer for the FBI. *u*

"We realize that people inform on others because they feel the government should be made aware of 'dangerous' people; we also know that many informers are coerced into informing because of previous arrests, etc. We believe that a system which asks or forces people to spy on their sisters and brothers has no right to exist. You are perpetuating injustice by continuing your activities. *u*

All outgoing mail for the Town of Princeton, New Jersey and Princeton Township, New Jersey, is handled at the Annex. Any package bearing a date stamp of March 19, 1971, in the AM would have probably been mailed after 7:00 PM on the evening of March 18, 1971. There are four employees in the Annex who are in charge of handling and stamping outgoing mail. He identified these employees as [redacted] [redacted] and [redacted] ✓

b6
b7C

The Post Office Department at the Annex utilizes machine stamps for all letters and on the morning of March 19, 1971, there would have been approximately 5,000 to 8,000 letters stamped through these machines. *u*

On envelopes larger than the normal size letter envelope and on all packages they utilize a hand stamp. On the morning of March 19, 1971, there would have been approximately 700 to 1200 large size envelopes and packages stamped through the Annex. All outgoing mail is either deposited at the Princeton Post Office in Princeton, New Jersey, or in individual mail boxes located throughout the city of Princeton and Princeton Township. There is a small contract Post Office Station in the Princeton shopping center, however, he does not know exactly where this contract station is located. *u*

Letters dated 3/31/71 from
"The Citizens Commission to
Investigate the FBI" mailed
to various people in the
Philadelphia area

Concerning the letters dated March 31, 1971,
mailed to various Philadelphia area residents by "The
Citizens Commission to Investigate the FBI," identified
as Q100 through Q111 and Q144 and 145 in FBI Laboratory
Reports, it was noted that two of the envelopes containing
these letters bore imprinted stamps "The Age of Reptiles." *u*

The Postal Inspection Office in Philadelphia has
advised that preprinted stamped envelopes are available
at every Post Office in the U.S. and cannot be identified
as coming from any particular location. Three-hundred
thousand of "The Age of Reptiles" stamps were distributed
to post offices in Philadelphia and are readily available
at any post office in the area. *u*

The Postal Inspector also advised that mail from
every post office box and station in Philadelphia is taken
to the Main Post Office, 30th and Market Streets for
cancellation. This mail is run through anyone of several
cancelling machines and there is no way by which the post
office can determine from what area in Philadelphia pieces
of mail are obtained. *u*

Concerning the letter from "The Citizens Commission
to Investigate the FBI" mailed to the various Philadelphia
area residents as set forth above, Laboratory Reports
relating to the letters and envelopes in which sent
(Items Q100 through Q111) states that the typewriter
impressions on these items most closely resemble the
Laboratory standards for Royal Elite Merit style of type. *u*

b6
b7c

On April 6, 1971, [redacted]
[redacted], and [redacted] Royal Typewriter
Company, 3913 Chestnut Street, Philadelphia, furnished SA
[redacted] with the following information: *u*

29

1. Royal Merit Elite has been in use for about ten years and was created to compete with IBM Prestige Elite. It is almost impossible to distinguish between the two. *u*
2. About 6,000 typewriters per year are sold in the Philadelphia area with perhaps ten per cent having Royal Merit Elite type. This would mean that in the past ten years about 6,000 typewriters with the pertinent type have been distributed in the Philadelphia area. *u*
3. Royal Merit Elite type can be used on portables, manual, and electric typewriters. *u*
4. The Royal Typewriter Company District Office, 3913 Chestnut Street, Philadelphia, Pa., is the only place in Philadelphia where a new Royal typewriter can be purchased. Second-hand typewriters can be purchased from numerous outlets. *u*
5. Records are available in the Philadelphia District Office for the past two years listing purchasers of Royal typewriters indexed by serial numbers. Records older than two years have been destroyed. *u*
6. The headquarters of Royal Typewriter Company, a division of Litton Business Systems, Inc., is at Hartford, Conn. An index is maintained there, only by serial number, of all typewriters sold. These records would not indicate the type face or the purchaser's name. *u*

Specimens received 4/2/71

- Q96 Copy of one-page typewritten press release, beginning "RESIST, a national resistance support group..."
- Q97 Pamphlet entitled "A NEW CALL TO RESIST ILLEGITIMATE AUTHORITY," beginning "Opponents of the Vietnam War..."
- Q98 Pamphlet entitled "RESIST A CALL TO RESIST ILLEGITIMATE AUTHORITY," beginning "RESIST was founded in mid-1967 by a group..."
- Q99 Envelope postmarked "CAMBRIDGE MASS MAR 24 '71," bearing typewritten address "Tom Wicker Editor: New York Times New York City, New York"

Result of examination:

It was determined that the typewriter impressions on Q99 were not prepared with the questioned typewriters that prepared Q1 and Qc2, previously submitted.

Q96 through Q99 contain no watermarks or indented writing of value. Q99 contains one ten-cent and one twenty-cent U. S. postage stamps, both from a Friden Meter #709881, at Cambridge, Massachusetts.

Photographs of the mimeograph, Q96, as well as the other specimens, have been made. The submitted evidence will be returned separately.

Request

Specimens received 3/31/71

Request examination of note at bottom of page Q18 and other photocopies of the same page.

Specimens received from Newark, 4/1/71

The following items were listed in Laboratory report to Newark dated 10/6/70, Bufile 25-615552:

- Q2 Piece of brown cardboard bearing notations in black ink
- Q3 Small piece of white cardboard with gold back, bearing notations in blue ink
- Q4 Black diary type book with handwritten and hand printed quotations, verses, sayings, etc., and five clear plastic envelopes containing miscellaneous notes, letters, and a business card of [redacted] Attorney at Law"
- Q5 Manila envelope containing various personal papers and identification and miscellaneous papers found on [redacted], and one clear plastic envelope containing a piece of yellow lined paper with penciled notations
- Q7 Ryden Rental Contract #787845, bearing name [redacted]

Result of examination:

It was determined that the typewriter impressions on the note at the bottom of Q18 and similar copies were not prepared on the typewriters used to prepare Q1 and Qc2. These typewriter impressions are too limited to determine the make and model of the typewriter used. The significance of the contents of the note was not determined. The hand printing on the note is possibly distorted and is not sufficiently comparable with the hand printing on Q48 and Q49 for meaningful comparisons to be made.

It was further determined that the hand printing on specimens Q2 through Q5 and Q7 in the case captioned [redacted] [redacted] et al.; SSA," was not prepared by the writer of the questioned hand printing on Q48 and Q49.

The evidence submitted by Newark is returned to Newark with copies of this report. Photographs of this material have been made.

K9 One-page handwritten letter dated 12/18/70, envelope and accompanying handwritten letter (two-page) dated 12/17/70, and photocopies of four-page handwritten letter dated 3/11/71, bearing handwriting of [redacted]

b6
b7C

K10 One-page letter dated 12/25, bearing handwriting and hand printing of [redacted]

ALSO SUBMITTED: Photocopy of FD-302 dated 3/26/71, beginning [redacted]."

Result of examination:

It was determined that the questioned hand printing on Q48 and Q49 was not prepared by [redacted] K10.

The handwriting of [redacted] K9, is not comparable with the hand printing on Q48 and Q49.

Cryptanalytic examination of the letters designated K9 did not locate any hidden code or cipher messages. It should be noted that double meaning, wherein certain words or phrases are given arbitrary meanings by the correspondents, could be present, but there is nothing to indicate that it is.

The submitted evidence will be returned separately. Photographs are retained.

Q111 Accompanying copy of typewritten letter dated 3/31/71, beginning "On March 8th, the Citizens Commission..."

Result of examination:

The typewriter impressions on Q100 through Q111 most closely resemble the Laboratory standards for Royal Elite Merit style of type. This style of type has not been used on questioned specimens previously submitted in this case.

The copies of the typewritten letter are electrostatic copies. This copy process is used by twenty-seven companies in the United States on several models of each company. These copies do not contain the characteristic markings of questioned specimens received from Xerox 660 models.

The envelopes, Q102, Q104, Q106 and Q110 are United States Post Office envelopes. The stamps on Q100 and Q108 are from sheets of stamps. The envelopes, Q100 and Q108, and the copies of the typewritten letter contain no watermarks or indented writing of value.

The submitted evidence was searched through the appropriate sections of the Anonymous Letter File without identification.

The submitted evidence will be returned separately. Photographs are retained.

FBI File No. 52-94527

Lab. No. D-710407061 LC

Specimens received 4/7/71

Request examination of the envelopes and copies referred to in Butel 4/3/71 to determine the following:

Could the typewriting be IBM Prestige Elite style of type

Was it made on a manual, electric, or portable typewriter

Was a fabric or a carbon ribbon used

M Result of examination:

The typewriter impressions on Q100 through Q111 are Royal Merit Elite style of type and not IBM Prestige Elite.

A fabric ribbon was used in the preparation of the typewriter impressions on the envelopes, Q100, Q102, Q104, Q106, Q108, and Q110. It is not possible to determine the model of the Royal elite typewriter used in the preparation of Q100 through Q111 since Merit Elite style of type is used on the electric, standard and, on special purchase, the portable typewriter, also. The type of ribbon used to prepare the typewriter impressions on Q101, Q103, Q105, Q107, Q109, and Q111 cannot be determined from the copies submitted.

Result of examination:

The typewriting appearing on Q144 and Q145 most closely corresponds with the Laboratory standard for a Royal Elite Merit style of type. This style of type has been used on items previously received in this case, i.e., Q110 and Q111.

The Q145 letter appears to be a Xerox copy, but this copy does not contain the characteristic markings of the questioned specimens previously associated with the Xerox Model 660.

No watermarks or indented writings were observed in the examination of the Q145 letter. The Q144 envelope is a stamp embossed envelope available in U. S. Post Offices. This type envelope has been used previously.

Specimens Q144 and Q145 have been photographed and will be returned separately.

The second sheet enclosed in the above-mentioned envelope was an announcement from the Citizens Commission to Investigate the FBI regarding the removal of files from an East Coast office of the FBI the night of March 8, 1971. This sheet appears to be a xerox copy of a typewritten statement issued by the Citizens Commission to Investigate the FBI. [redacted] stated that since neither of the sheets of paper were signed, they were not deliverable to inmate [redacted] under FYC regulations. [redacted] stated that in view of the nature of the contents of the letter, and in view of the fact that these papers were unsigned, the envelope and two above-described sheets of paper had been confiscated. [redacted] added that the above items could have been confiscated and destroyed or returned to the addressee; however, in view of the contents, he had retained the documents and decided to now submit same to the FBI.

The following investigation was conducted at Baltimore, Maryland by Special Agent [redacted] concerning a news release on activities of "The Citizens' Commission to Investigate the FBI," mailed in an envelope bearing the return address "School Sisters of Notre Dame, 10335 Aisquith Street, Baltimore, Maryland, 21202." *u*

b6
b7C

Sister [redacted] School Sisters of Notre Dame, a Catholic High School, at 901 Aisquith Street, advised on March 31, 1971, as follows: *u*

b6
b7C

BALTIMORE, Md.
The address of 1033 Aisquith Street, is a convent occupied by nuns of this order who teach at St. James Elementary School, also at 1033 Aisquith. Another order of Catholic nuns known as the Sisters of Notre Dame de Namur, occupy the address of 1035 Aisquith Street. Activities and identities of the nuns at 1035 Aisquith Street are unknown to her. *u*

The school at 901 Aisquith Street does not have a Xerox machine, but owns a 3M Duplicating Machine, which uses sensitized paper, thinner and different in texture from regular bond paper normally used in Xerox machines. The nun in charge at 1033 Aisquith Street is Sister [redacted] who was also Principal of St. James Elementary School. She does not know whether St. James School has a Xerox machine. *u*

b6

Sister [redacted] 1033 Aisquith Street, advised on March 31, 1971, as follows: *u*

b6
b7C

The address of 1035 Aisquith Street, Baltimore, Maryland, is now occupied by five nuns of an order known as Sisters of Notre Dame de Namur. They are assigned here from the mother house in Ilchester, Maryland. The work they perform is not known specifically, but is believed for the most part to be social work. Specific identities of these five nuns, who wear secular attire, is not known. Approximately two weeks after [redacted] referring to [redacted]

committee" to prepare a defense for the aforementioned three and others, charged in Harrisburg, Pennsylvania with conspiracy. They borrowed some envelopes from her, apparently to mail out some defense literature. Nothing else was borrowed. This school has a 3M duplicating machine, not a Xerox. She does not believe the nuns next door at 1035 Aisquith Street, have a duplicating machine since they did not even appear to have sufficient resources to buy envelopes. She does not know the extent of their activities, nor has she observed any "defense literature" from next door. *u*

A white female at 1035 Aisquith Street when advised of the identity of Special Agent [redacted] on March 31, 1971, refused to identify herself. When further questioned as to whether she is a Catholic nun, she replied in the affirmative. She refused to comment when asked any knowledge regarding "The Citizens Commission to Investigate the FBI," immediately terminated the interview and closed the door. *u*

On February 3, 1971, [redacted]

b6
b7C

"In order to enlighten you to what has happened concerning the recent indictments of Catholic priests, nun and laymen, we present the following: *u*

" To attribute kidnapping and bombing to priests who have neither the philosophy nor resources to support such activity, must spring from the desperation of men who have decided to stop at nothing in order to crush the anti-war movement. We are confident that neither ourselves nor our thousands of co-conspirators will bow to such criminal misuse of power. *u*

On April 1, 1971, the inmate file for [redacted] Petersburg, Virginia, Federal Reformatory, was made available for review by [redacted] Records Officer of that institution, to Special Agent LAURENCE E. WESCOTT. The following pertinent information was noted from this file:

b6
b7C

[redacted] who was sentenced in the Northern District of New York to a term of one year and three months for violation of the Selective Service laws, was received at institution on December 19, 1970. [redacted] was reflected as having a parole hearing at that institution on March 19, 1971, at which time the Parole Board declined to issue parole permission to [redacted] and ordered his confinement to extend to the expiration date of November 6, 1971, taking into consideration good time earned by [redacted]

b6

A comment on the part of [redacted] case worker, [redacted] reflected that if [redacted] was not paroled he had stated to [redacted] that he would live in Maine where many of his friends "in the movement" were then living.

b6
b7C

This file reflected that a case worker's analysis of [redacted] indicated that he was "arrogant", very bitter toward the U. S. Government and against Governmental authority.

The file further reflected that on February 17, 1971, [redacted] received "The Guardian" newspaper sent to him by [redacted] Rochester, New York. [redacted] was listed as a friend by [redacted]
